Same great features, with more power!

Solar Batteries

Store energy, be prepared!

Worry-Free 5 Step Service Guaranteed

If you're looking for a way to go solar that doesn't involve all the hassle of a traditional installation, we've got you covered.

Sale

Our sales team is here to help you find the perfect system for your needs and budget. They're experts in all things solar and can answer any questions you may have about how to get started with going solar.

Finance

Our finance team will help you find the best financing option so that going solar is within reach for everyone. Whether it's a lease or loan, they'll work with you to find a program that works best for your needs and budget.

Permits

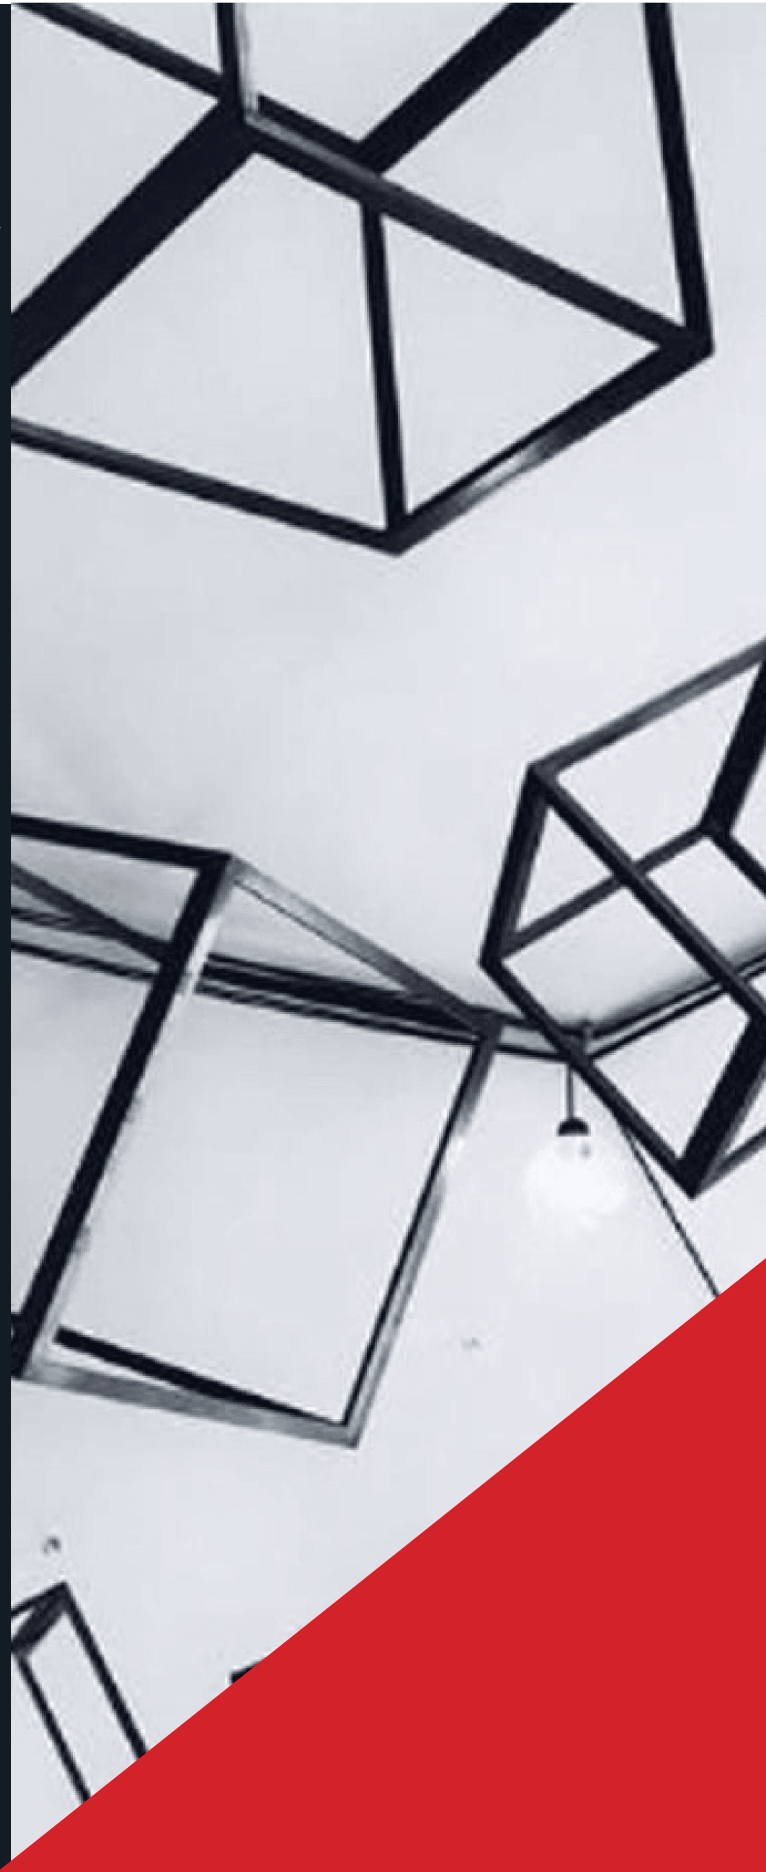

Getting permits is not fun! But our permit team makes it easy! We'll handle everything from getting the necessary approvals from your local municipality or county government all the way through installation so there's nothing left for you to do but sit back and enjoy the savings on your utility bill every month!

Installation

We've got installation covered too! Our expert teams will come out and install your system quickly and efficiently so that there's no downtime at home or work while.

Maintenance

After the installation is complete, we take care of regular maintenance on your system so that it stays running smoothly year after year.

Options

Lease

Purchase

- Monthly charge to "rent" the system and use the energy you produce
 - The lease and remaining utility bills are lower than the previous electric bill
 - Guaranteed support for 25 years.
 - If you sell your home you can transfer the lease to the new homeowner (subject to credit approval)
-
- Purchase your Gold Microgrid system
 - A home equity loan can be used and may be tax-deductible.
 - Keep any solar tax credits and/or state and local incentives if eligible
 - Purchasing Gold Microgrid system can maximize your savings. Over time, your system can pay for itself through your utility bill savings
